

local-notes sample PDF

This tiny file exists so the demo has a PDF to embed.
It is generated by a ~30-line script (see demo/assets/),
so the repository stays free of binary bloat.

What this demonstrates

- `<PdfViewer src="/vault/assets/sample.pdf" />`
- auto-embedded markdown links pointing at .pdf files
- Obsidian-style `![[sample.pdf]]` embeds

Edit this text, re-run the script, refresh the page.
